Input Metered, Outlet Switched PDU Data Sheet – Advantage Series

The EN2316E Input Metered, Outlet Switched PDU combines energy metering, power and environmental monitoring with remote outlet on/off switching to monitor, protect, and manage the rack environment. Utility grade metering at the phase input and internal circuit breaker levels provides comprehensive overload monitoring. Outlet power-up sequencing protects against inrush current overload and allows users to define equipment boot-up order and timing. While remote on/off control allows authorized users to power-cycle remote equipment and implement rack-level power access controls to power on/off each outlet. Advanced network management features allow for remote access and integration with accessories including environmental monitoring and security access solutions.

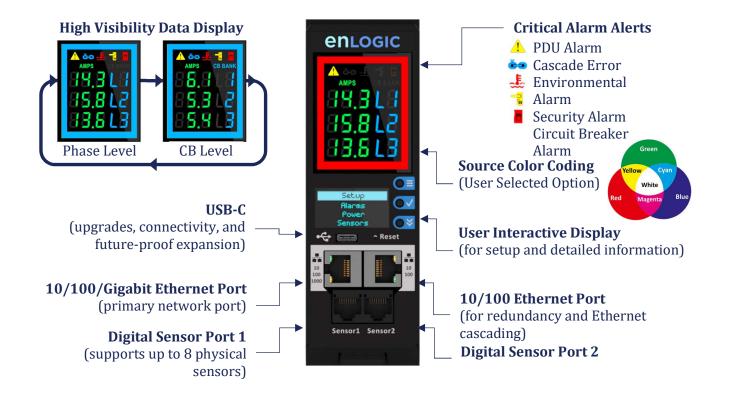

PDU Function				
Metering Attributes	Voltage(V), Current(A), Apparent Power(kVA), Real Power(kW), Power Factor, Energy (kWh)			
Metering Accuracy	± 1% to ISO/IEC 62052-21			
Metering Locations	Input phase and circuit breaker measurements			
Remote Outlet Switching	Yes			
Electrical Input				
Input Plug Type	NEMA L6-20P			
Acceptable input voltage	100-240VAC, 1ph			
Input current (phase)	20A (16A derated)			
Input frequency	50/60 Hz			
Max Input power	3.33 kVA @ 208 VAC			
Electrical Output				
Output voltage	208 V			
Maximum output current (phase)	20A, (16A UL Derated)			
Overload protection (internal)	No internal circuit breakers			
Outlet configuration	(12)C13, (4)C19			
Physical				
Chassis Dimensions (L x W x D) in	36.1 x 2.05 x 2.09			
Depth at circuit breaker, in	NA			
Input cord length	10'			
Environmental				
Operating Temperature	-5 to 60°C (23 to 140°F)			
Storage Temperature	-20 to 60°C (-4 to 140°F)			
Humidity (operating/storage)	5-90% RH / 5-95% RH; non-condensing			
Max operating elevation, above MSL	3,000 m (9,840 ft)			
Compliance				
Safety & Environmental	UL Listed to UL60950-1, FCC Part 15B, RoHS Compliant			

20A (16A derated), 100-240VAC, 1ph

Overcurrent Protection

Circuit Breaker Configuration				
Circuit Breaker Type	No internal circuit breakers (temperature stable)			
Circuit Interrupt Rating	5,000 Amps (UL489)			
Circuit Breaker Trip Curve	Sensata Trip Curve 62/Carling Trip Curve 24			
Inrush Pulse Tolerance	10 times rated current (approx.)			
Dielectric Strength	3,750 VAC, 60Hz, 60 seconds between all electrically isolated terminals			
Vibration	Shall not trip when vibrated to MIL-STD-202, Method 204, Condition A, 100% load			
Temperature Rating	-40 to 85°C(-40 to 185°F) Ambient			
Handle Off Guard	Yes, protects against accidental user actuation to OFF position			

Model: EN2316E 20A (16A derated), 100-240VAC, 1ph

About CIS

CIS Global has delivered superior product development, manufacturing, and logistics management since 1955 to small and large customers across the globe. We specialize in data center products including mechanical motion and power management solutions. As world market share leader in precision server rails and OEM market share leader in PDUs, CIS designed and built products are found in nearly every data center worldwide

CIS has more than 20 years' experience manufacturing more than 2-million best-in-class PDUs. CIS acquired Enlogic in 2015 and remains dedicated to providing the industry's most innovative power management solutions build with the

highest manufacturing quality.
